Information and Communication Technology –
Acceptable Use Policy

St Bernard’s actively supports student access to a wide variety of information resources. We encourage students to be able to acquire the knowledge and the skills to analyse and evaluate the use of these resources. It is expected that students and staff will use ICT resources of the college in an appropriate manner at all times and ensure care of all the resources.

Rationale

St Bernard's College is committed to ensuring students and staff have the opportunity to use ICT to help ensure that we educate for excellence. We are committed to ensuring that use of ICT supports staff and student learning and does not impact on the safety, wellbeing and rights of all members of the community.

Aims

To help educate a community where excellence is promoted, we aim to recognise the importance of the use of ICT and emerging technologies and aim to provide the technology to staff and students to support this.

The attached procedural guidelines aim to ensure that staff and students use ICT provided by the College in a way that supports their education and respects the rights of all.
